Description: EIFS Casing Bead creates a clean, straight edge around windows, doors and other transitions. Perforations in the flange help the base coat lock in, while the smooth PVC surface retains caulk and paint. A simple way to get a polished, professional look that lasts. Available in weeped or unweeped options to suit your project needs.

Advantages: Made from exterior grade PVC. Provides a high impact resistant, rust-proof termination corner.

Applicable Standards: Rigid exterior grade PVC products made by Trim-Tex meet ASTM specifications C926, C1063, C1780, C1861, D1784 and D4216.

Installation: Trim-Tex recommends following established acceptable industry standard installation methods. All butt joints, intersections, and ends should be caulked at the time of installation using elastomeric sealant. When painting Trim-Tex Exterior products, please refer to our painting resources to ensure proper performance and prevent product defects such as warping, oil canning, and buckling.
