CBWP-15-16L	1 1/2"	10'	35
CBWP-2-16L	2"	10'	30

Description: CB STARTER TRAC™ with Drip Edge creates a strong, clean shelf for EPS board to rest in, while the extended face acts as a built-in drip edge to direct moisture away from the system. Perforated flanges allow the base coat to grip securely to the EPS board and the rigid design forms sharp, impact-resistant edges. This solution is a smart way to protect your finish from moisture damage and ensure straight lines. Available in weeped or unweeped options to suit your project needs.

Advantages: Made from exterior grade PVC. Provides a high impact resistant, rust-proof termination corner.

Applicable Standards: Rigid exterior grade PVC products made by Trim-Tex meet ASTM specifications C926, C1063, C1780, C1861, D1784 and D4216.

Installation: Trim-Tex recommends following established acceptable industry standard installation methods. All butt joints, intersections, and ends should be caulked at the time of installation using elastomeric sealant. When painting Trim-Tex Exterior products, please refer to our painting resources to ensure proper performance and prevent product defects such as warping, oil canning, and buckling.
